### Marijuana is SAFER than Alcohol.

Every objective study on marijuana has concluded that it's far less toxic, far less addictive, and poses far less harm to the body than alcohol. Also -- unlike marijuana use -- the use of alcohol significantly contributes to incidences of overdose, injury, sexual assault, date rape, fighting, rioting, property damage, and other problems.

Yet laws and campus policies are steering people -- particularly college students -- toward using alcohol and away from using marijuana: a less harmful substance.

If you appreciate the fact that marijuana is safer, and agree our laws and policies should reflect that fact...

**Now is your chance to help!**
